An Open Letter

To the head of all states/governments of the world and all global organizations including IMF but concern with UN.

Issue: Life first. Save life from the Coronavirus Pandemic and its consequences.

Thanks to all responsible members of this chief executive club of the world and thereby the main actors to serve the capitalist society – a global system based on commodity production and wage slavery but, rooted on private property.

You know better the sufferings of the whole human being; horrible and tremble condition of whole society ; irreparable loss of lives; uncountable loss of production, both in industry and service sector; damage of structures; collapse of economy; disaster in social life; and dangerous hardship and miserable conditions of the wage slaves and jobless workers or unemployed or daily earners by the Coronavirus – a much more smaller than a single cell Bacteria by defeating you all to halt its nonstop journey all over the world by infecting millions.

In fact, the whole world is under lock down by you but not from a single common date to a definite period to halt the corona train to avoid the spreading of the corona virus to avoid infection by corona all over the world, if it is effective but you did it individually and from different dates separately in your respective jurisdiction without considering the global range of your society along with a modern but global transport and communication system for the international trade and commerce and thereby the range of Coronavirus-the number one public enemy of the world . Is it not the failure of you to realize the gravity and severity of Coronavirus Pandemic and thereby the failure to face and defeat the Coronavirus – the number one terrorist of the world by the same policy what you are still practicing? Noted, quackery is not final solution but scientific effort is needed to face, defeat and eradicate coronavirus to overcome the unwanted disaster by it.

Sure, history of epidemic or pandemic by various viruses/bacteria is not new or first or last or it's not the age of nature dependent, local and poor economy with a scattered public rather you the people are executives of a modern and rich global society with a well communicated human being along with modern science along with ICT with a handsome number of expert scientists including virologists and a huge amount of money or wealth .Therefore, you cannot do what the earlier rulers did to handle the viruses and consequences

of these. But, sorry, even still coronavirus is unknown but why?

Is it not the condition to know the enemy properly to fight it perfectly to win? However, could you like to say the date from which the situation will be normal by defeating Coronavirus- the unfit fighter against the modern human being or how many people will die from corona and its unthinkable but dangerous consequences including famine or, how many dead bodies will stay at street or other places for funeral as unidentified or when the required medicines, vaccines etc will be invented to prevent and treat the corona infected by exercising much more scientific method?

Sure, you know better that the working men, unemployed and jobless men or daily basis earners are the worst sufferer form this worst situation. But, working men are not only the money making human tools of the moneyed men but they are also human being by the universal declaration of you too, and really they are not only human being but also the producer of commodity for your society but, own by the ruling capitalist class thus they have right to live with dignity and safely and everyone have the same right. Mentionable, the ruling class even the upper fraction of the capitalist class of the society is not free from the suffering of the said coronavirus. So, it's your duty and task to work together to fight and defeat the Coronavirus by the integrated global scientific effort to save lives and to protect

resources by avoiding the unthinkable but upcoming so waste and dangerous situation.

But, some of you are quarreling and accusing each other for using coronavirus as a bio-weapon by violating the international convention or respective treaties for not using of MDW for creating such terrible situation and miserable conditions to gain sectarian interest. However, if any party have proof to prove his claim then it's wise and best to publish and submit the records of proof to take proper action by the proper body by the support of all sufferers by corona and peace lovers of the world but not spreading intentional political propaganda.

Sure, a simple policy is as: Life first. Save life by defeating and facing coronavirus and its consequences by the integrated global scientific effort of the chief executive club. Undoubtedly, it is an effective policy to face, defeat and eradicate the Coronavirus and overcome the waste situation by it to save life.

So, it's your responsibility to do everything scientifically and logically by involving the whole human being by following the said policy to win within shortest period by defeating Coronavirus and other viruses, bacteria etc to save life. Some of these to do immediately and urgently are as follows:

1. Holding a global political teleconference to build a global political consensus to work together to fight and face jointly and unitedly against coronavirus and its consequence to provide all out support to the victims

and fighters; and to rehabilitate all affected of the world by exercising the best power of all members of the executive club according to their highest capacity and best ability by using the good wishes of every office. Chief executives of the G-7 can take an initiative to arrange it as early as possible.

2. Holding a global scientific summit of the concerned but expert scientists of the world to know the unknown coronavirus by discovering its origin, source, chemical properties, nature, effective period etc, to invent the medicines, vaccines; and to suggest or updating health code or any other suggestion or advice, if necessary. WHO can shoulder the key responsibility to arrange and hold it by using latest technology within shortest possible time.

3. (A)If 'lock down' is helpful to control the spreading rate of coronavirus to reduce the rate of infection then go for lock down the whole world for a particular period from a single date by making a joint statement of you the members of the said club by requesting all of the world to make sure it but providing all daily necessities and waiver the tariff of all utility services and house rent to the all types of workers, unemployed, jobless and needy men by the respective governments and concern authorities but arranging the required cash and kinds by this executive club jointly is the condition for the success of it.

(B) If ‘testing, testing and testing’ policy is effective then go for random Test to identify infected for separation and isolation to minimize the rate of transmission by Coronavirus.

(C) Make sure the personal protection of the duty men of the emergency services to fight best.

(D) Make sure the necessary medical equipment’s including ventilator to the health care service to fight best.

(E) No hide and seek or blame game but make sure the exact information about the situation, what is the right of everyone.

4. Make sure free treatment of all infected by coronavirus and other viruses i.e. Ebola, Dengue etc of the world.

5. Make sure risk incentive for all duty persons of all emergency services including health care-the front-line fighting force.

6. Make sure leave with pay or grant in Aid for all workers; and Aid to live for all unable persons to work of the world.

7. Make sure job or alternative job for all terminated workers or workers of the closed industries and firms.

8. IMF will suggest you for providing different type of incentives to the losing investors but no policy to allot any fund to the solvent party or to misuse by any one.

9. Forming a special global fund to support all victims by the viruses including Coronavirus of the world.

10. Forming a global organization of volunteers to support and help all affected or victims by viruses including Coronavirus, recruited from the different strata of society mainly students, youths, workers, unemployed, retired etc groups those are interested to do so. May be the size of the force will constitute with at least 5% of the total population of the world to do every work with the collaboration of the emergency services.

11. Forming a global commission to investigate the events of violation of International convention and treaties for not using or producing the bio-weapons to recommend the action against the culprit or culprits if any one committed such heinous misdeeds against the humanity.

12. Destroy and Vanish all mass destruction weapons of the world including bio-weapon to save life from the mass destruction and massive disaster.

13. Found a global scientific research Centre to work for all out development of science.

Finally, you know better that there was per capita GDP \$17,500 and total GDP of the world was \$127.8 trillion only in the year of 2017 and thereby what is the total amount of capital of the world till today, produced by the wage slaves? Is the average per head share less than \$1,40,000 in current amount of capital or capitalist assets of the world? Thus, there is enough and enough money and resources to do the same.

So, hope for the best and do everything to save life.

With Thanks
